

Red River Basin Project Team Handbook

SECTION 6.

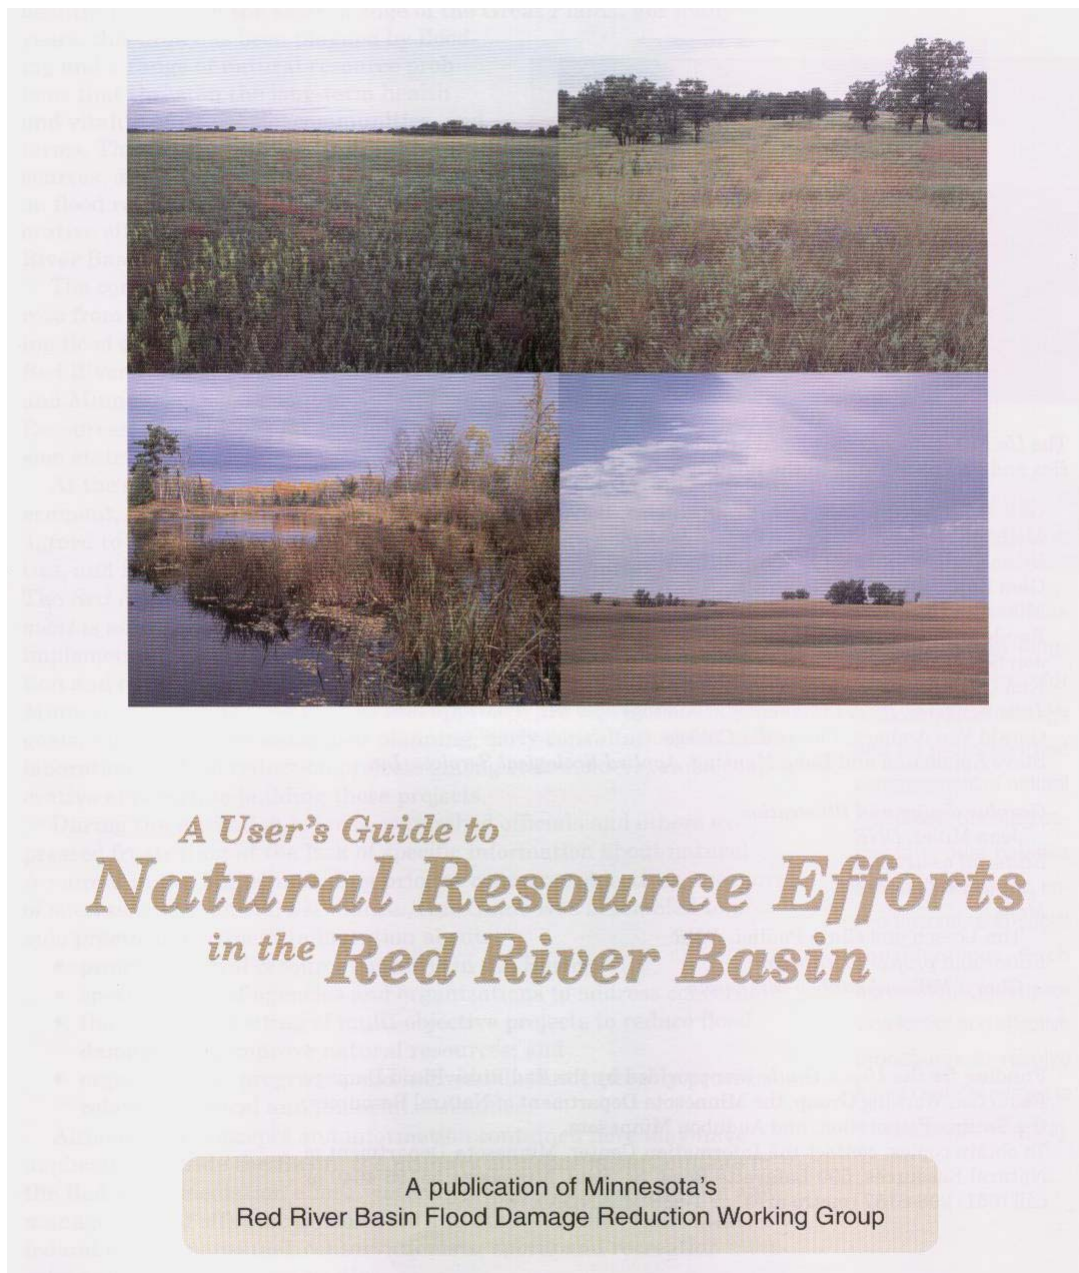

Appendices

This section provides an overview of what is available to inform project teams as they develop projects.

- ⇒ 6A - Red River Basin Flood Damage Reduction Work Group Agreement...the original agreement adopted 12-9-98 which created project teams. This document includes the [revised] Watershed Management Plan Content which reflects the changes in next generation watershed district plans envisioned through the Red River Mediation process (*see attachment*).
 - ⇒ 6B - TSAC Technical Papers...a listing of all the technical papers available. Copies of ALL technical papers are available for handy reference in a separate Project Team Handbook binder or they can be downloaded at <http://www.rwmb.org/html/info.cfm?ID=10#TSAC>
 - ⇒ 6C - User's Guide to Natural Resource Efforts...this guide includes information on natural resources in the Red River Valley, suggestions for multi-objective projects, and includes an index for natural resource organizations, programs, etc.
-

User's Guide to Natural Resource Efforts in the Red River Basin

One copy of this publication is in the Project Team Handbook Appendix (*separate 3-ring binder*) available in the watershed district office...additional copies are available upon request.

Red River Basin Project Team Handbook

The *Red River Basin Project Team Handbook* is designed specifically for watershed districts, but other government entities (i.e. state or federal agencies, local governmental units, etc.) who might serve as a project proposer would find this a helpful resource. Specifically, this Handbook outlines the process for developing projects that address substantial water management or resource management problems, and/or that would benefit from early and on-going stakeholder communication and collaboration – follows the direction given in the 1998 mediated Agreement of the Red River Basin Flood Damage Reduction Work Group (RRBFDRWG).

The *Red River Basin Project Team Handbook* is designed to provide you with the information needed to give you a background on the Red River Basin Flood Damage Reduction Work Group agreement which created Project Teams. This guide is filled with information and tools to support the Project Team process. It also contains examples gleaned watershed districts in the Red River Basin in Minnesota through their work with Project Teams since 1999.

Authors

Jody Horntvedt, Extension educator, Leadership and Civic Engagement, and Associate Extension Professor, University of Minnesota (*who served as Project Team Facilitator, 1999-2003*)

Don Buckhout, Red River Basin Coordinator (2004-2007), MN Department of Natural Resources

Additional Contributors

Brian Dwight, Board Conservationist, Minnesota Board of Water and Soil Resources

Paul Wannarka, Red River Basin Coordinator, MN Department of Natural Resources

Paul Swenson, Commissioner's Office, MN Department of Natural Resources

Acknowledgements

Thank you to those who have shared their work for inclusion in this Handbook. Special thanks to Buffalo Red River Watershed District, Middle Snake Tamarack Rivers Watershed District, Red Lake Watershed District, and Two Rivers Watershed District for their great examples.

Use of This Handbook

The *Red River Basin Project Team Handbook* is designed for use as a resource for Project Teams in the Red River Basin. The tools in the Handbook are available for use on a CD-ROM found in the Watershed District Copy of the Handbook. We encourage you to make copies of the tools and examples in this guide for yourself and for those involved in your Project Team work.

Contact and Ordering Information

This Handbook is produced by the MN Department of Natural Resources. Copies of this Handbook are available in CD-ROM format from the Red River Basin Coordinator. Please make inquiries about this resource by calling (218) 308-2625 or writing the Red River Basin Coordinator, 2115 Birchmont Beach Rd NE, Bemidji, MN 56601
