**Roseau River**

**Spraque Greek Feasibility Study**

Of the three sites studied in the Roseau River Watershed District, the Spraque Greek site was the most feasible.

It has a drainage area of 200 sq. miles and would have over 10,000 ac./ft. of flood storage. It was estimated that it would cost $22,000.00 to $24,000.00 to complete the study which would include a computer analysis. A request for funds will probably come at our next meeting.

Chairman Ogaaaii reported that he has been in contact with the North Dakota Joint Board about a joint meeting in July. It was suggested that a one day tour, leaving Ada on July 10, 1981 at 9*30 a.m, be held.

Upon motion by Manager Uilkens, seconded by Manager Brekken to sponsor a tour with the North Dakota Joint Board, carried.

Dan Thul presented a form to be adopted for use by local Watershed Districts to obtain Lower Red and L.G.M.R. funding.

Upon motion by Manager Brekken, seconded by Manager Quern to adopt the form, duly passed.

Viet Ngo, Engineer from McCombs - Knutson and Associates reported on Phase I of a work plan prioritizing criteria for flood control projects. He reported that it will be done in the following manner.

1. Data collection
2. General topographical and land use inventory
3. Hydrologic analysis
4. Mapping of prioritizing zones
5. General coordination

Data collection has been completed. A report will be presented at each future meeting as to progress to that time.
Viet Ngo also stated that $600.00 was needed to obtain naps of the Red River basin from U.S.C.S.

Upon motion by Manager Quern, seconded by Manager Brekken to authorize Viet Ngo to purchase the maps from the U.S.C.S., carried.
